### Netflix Clone (12/2023 - 12/2023)

- Developed a Netflix-inspired web application using React.js, replicating core functionalities and user experience of the streaming service.
- Integrated API fetch for data retrieval from backend services, ensuring dynamic content delivery and seamless user interaction.
- github link: [🔗](#)
- website link: [🔗](#)

### LearnIt App (02/2024 - 03/2024)

- Built a React application "LearnIt" enabling users to upload, view, edit, and delete class notes, with access to a shared note bank featuring Razorpay integration for note purchases.
- Implemented authorization using middleware, employed Multer for file uploads, and utilized Express server and MongoDB for backend and database management.
- github link: [🔗](#)
- website link: [🔗](#)

### Easykart (03/2024 - 04/2024)

- Developed an Angular application "Student Portal" with features including admin login, dashboard with Angular Material, and options to add, edit, view, and delete student data.
- Implemented BehaviorSubject and guards for state management and security, and used JSON server for backend data handling.
